AstroBoard expanded desktop

AstroBoard expanded (mobile)

Leaderboard

Formats JPEG/GIF/PNG/HTML5

Creative size 728 x 90px

File size 50KB max

Half page

Formats JPEG/GIF/PNG/HTML5

Creative size 300 x 600px

File size 100KB max

MPU

Formats JPEG/GIF/PNG/HTML5

Creative size 300 x 250px

File size 50KB max

AstroBoard Units will run alongside either a 728x90, 300x250 or 300x600, depending on site setup

AstroBoard assets

In order to create a custom AstroBoard unit, Publisher Collective must receive all assets listed below at least seven working days before the campaign launch:

- Any key art PSDs
- All relevant fonts, as well as any brand guidelines we should adhere to for usage
- PNG/AI/EPS logo for the game/product
- PNG/AI/EPS logo for any developers or publishers you wish to include
- PNG/AI/EPS logos for any age ratings and game platforms
- Call to action to include on the unit, or any relevant CTA buttons
- Any high-res screenshots available
- PNG art of characters
- Video to include in the unit, maximum of 30 seconds. A 15 second video is preferable to ensure the final ad size falls under 4MB in line with Google Heavy Ad Intervention, this will allow us to set the video to autoplay. Alternatively the video will be set to click to play
- An MP4 is preferable but we can also download from YouTube

AstroBoard expanded desktop

AstroBoard expanded (mobile)

Universe Takeovers will run with an AstroBoard Unit, alongside a number of 970x250, 728x90, 300x250 & 300x600 banners, depending on site setup
